

# Handout 1: A Good Point

Figure 1

Use the Figure 1 for questions 1-5.

1. Name two points that are collinear with C.
2. Give another name for  $\overline{EG}$ .
3. Give another name for  $\overrightarrow{DF}$ .
4. Name a pair of intersecting lines.
5. Name a pair of parallel lines.
6. Is there a difference between  $\overrightarrow{BA}$  and  $\overrightarrow{AB}$ ?
7. Is there a difference between  $\overline{LM}$  and  $\overline{ML}$ ?
8. Any two points give exactly one line segment, one line, and one ray. Is this true or false?
9. Points that lie on the same line are called collinear. Is this true or false?
10. Intersecting lines are sometimes parallel. Is this true or false?
