## 7.RP.2: Worksheet

1. Write an equation that shows there are 8 cars for every truck in Los Angeles.
2. Do the points $(3,2)$ and $(18,12)$ represent a proportional relationship? Why or why not?
3. What's the unit rate in the graph in Figure 1? What point represents this?

Figure 1.
4. Does the following table show a proportional relationship between birds and cats?

| Birds | 7 | 21 | 35 | 49 |
| :--- | :--- | :--- | :--- | :--- |
| Cats | 1 | 3 | 6 | 9 |

5. Write an equation that shows there are five times more polar bears than grizzly bears.
6. In the equation $2 y=18 x$, what's the constant of proportionality?
7. Does the following table show a proportional relationship between Orcs and Elves? If so, what is the ratio of Orcs to Elves?

| Orcs | 1 | 2 | 5 | 11 |
| :--- | :--- | :--- | :--- | :--- |
| Elves | 3 | 6 | 15 | 33 |

8. The following table shows how much Big Al gets paid at his job. What's his hourly rate?

| Hours | 5 | 8 | 9 | 20 |
| :--- | :--- | :--- | :--- | :--- |
| Dollars | 62.50 | 100 | 112.50 | 250 |

9. Figure 2 shows the number of cicadas James can catch every hour. What does the point $(4,14)$ tell us?

Figure 2.
10. What's James' unit rate according to Figure 2?
