## Circles Worksheet 1 - Answer

Use the relationships $\frac{C}{C^{\prime}}=\frac{d}{d^{\prime}}=\frac{r}{r^{\prime}}$ or $\frac{A}{A^{\prime}}=\frac{d^{2}}{d^{\prime 2}}=\frac{r^{2}}{r^{\prime 2}}$ to solve the following problems. Round decimal answers to the tenths place unless otherwise instructed.

1. Given $\frac{C}{C^{\prime}}=0.25$ and $r=3.0 \mathrm{~cm}$, find $r^{\prime}$. $r^{\prime}=12 \mathrm{~cm}$.
2. Given $\frac{A}{A^{\prime}}=0.50$ and $d^{\prime}=3.0 \mathrm{~cm}$, find $r$.
$r=1.06 \mathrm{~cm}$
3. Given $\frac{C}{C^{\prime}}=0.5$ and $r^{\prime}=4 \mathrm{~km}$, find $r$. $r=2 \mathrm{~km}$.
4. Given $\frac{A^{\prime}}{A}=25$, find $\frac{d^{\prime}}{d}$. $\frac{d^{\prime}}{d}=5$.
5. Given $d=2.32$ in and $d^{\prime}=3.47 \mathrm{in}$, find $\begin{aligned} & \frac{C}{C^{\prime \prime}} \\ & \frac{C}{C^{\prime}}\end{aligned}=0.67$.
6. Given $\frac{r}{r^{\prime}}=4.97$, find $\frac{d}{d^{\prime}}$.
$\frac{d}{d^{\prime}}=4.97$.
7. Given $\frac{d^{2}}{d^{\prime 2}}=\sqrt{7}$, find $\frac{r^{\prime 2}}{r^{2}}$. Leave your answer in radical form. $\frac{r^{\prime 2}}{r^{2}}=\frac{\sqrt{7}}{7}$.
8. Given $\frac{d}{d^{\prime}}=0.75$ and $C^{\prime}=7.77 \mathrm{ft}$, find $C$.
$C=5.82 \mathrm{ft}$
9. Given $\frac{A}{A^{\prime}}=\frac{4}{5}$ and $r^{2}=80 \mathrm{mi}$, find $d^{\prime}$. $d^{\prime}=20 \mathrm{mi}$
